# CONTENTS — СОДЕРЖАНИЕ

**Bajpai, S. D.**, Some expansion formulae for Fox's $H$-function of two variables involving associated Legendre functions ..... 3—12

**Ditzian, Z.** and **Ivanov, K. G.**, Minimal number of significant directional moduli of smoothness ..... 13—27

**Garcia, J. B.**, Interpolation of weighted Orlicz-valued function spaces ..... 191—215

**Гуличев, Н. В.**, Об оценках норм суммы Фурье-Уолша ограниченных функций .... 101—111

**Krasičkov—Ternovskiĭ, I. F.**, Spectral synthesis on a system of unbounded domains starshaped in a common direction ..... 217—223

**Kroó, A.** and **Peherstorfer, F.**, On the asymptotic distribution of oscillation points in rational approximation ..... 225—232

**Кузнецова, О. И.**, О частичных суммах по полиэдрам рядов Фурье ограниченных функций ..... 267—272

**Kuprikov, Yu. E.**, On the order of Fourier coefficients in the sense of Cesàro means ..... 113—134

**Куркиев, А. Б.**, Условие ограниченности осцилляционных интегралов с кубическим многочленом ..... 29—38

**Ky, N. X.**, Some imbedding theorems concerning the moduli of Ditzian and Totik ..... 255—265

**Leindler, L.**, Generalizations of some theorems of Hardy and Littlewood concerning power series and moment constants ..... 135—149

**Liflyand, E. R.**, On asymptotics of Fourier transform for functions of certain classes .... 151—168

**London, R. R.**, Derivatives of the maximum modulus of a starlike function ..... 39—52

**Mahato, A. K.** and **Maindwal, R.**, Inversion and structure formulae for a generalized Laplace transform ..... 233—241

**Пашников, Б. В.**, О множителе Вейля для сходимости сумм Римана ..... 243—253

**Salmanov, Yu. D.**, On certain imbedding and extension theorems for a weighted class of functions ..... 273—295

**Soloviov, V.**, Duality for nonconvex optimization and its applications ..... 297—315

**Yang, Chengmin**, $WT$ measure vector spaces ..... 53—64

**Yongping, Liu**, Infinite dimensional widths and optimal recovery of some smooth function classes of $L_p(R)$ in metric $L(R)$ ..... 169—182

**Zelin, He**, The $p$-adic differential-integral type operator ..... 65—84

**Zhou, D. X.**, Converse theorems for multidimensional Kantorovich operators ..... 85—100

**Zhou, S. P.**, A remark on two conjectures of Hasson concerning lacunary approximation 183—190
